

The students have graduated. Now what? It does not stop here. Now it's up to the Development team to track job placement, provide services to alumni, and develop donors and resources for future growth.

- Create accounts for donors of all types
- Track donations
- Print donation receipts and end of year statements
- Merge demographic data to create mailings
- Track job placements and employment details
- Use follow-up tracks to automate duties
- Manage events by sending invitations, tracking R.S.V.P.s, designating VIPs, etc.

GradPro will enable your Development team to find former students and past donors to send mailings and stay in touch. It's a great way to develop the funds needed to grow for the future.
